

Impediment Backlog

- **Configuring Projector:** Which Channel to use??
- **GitHub Problem**
 - Merging Problems: automatic merges didn't make any sense
 - pulling from a branch doesn't pull newest version of code
- Time Estimation were not up to the mark
- In the starting: tasks were too vague
- Organization (who has time when?)
- Room Reservation Problems
- Problems with EmguCV files: had to be copied manually every pull
- VisualStudio version incompatibility problems
- High end computer hard to use for performance testing because of admin rights
- missing HDMI cabel
